He foretold eclipses and solstices."

• All written works of Thales on astronomy are lost.

• Refer to Wiki page on "Eclipse of Thales" for details.

Some reconstructions of Thales's possible method

1. How Thales was Able to Predict a Solar Eclipse without the help of Alleged Mesopotamian Wisdom — Dirk L. Couprie

2. Eclipse Periods and Thales's Prediction of a Solar Eclipse Historic Truth and Modern Myth — Willy Hartner

• Note: These are highly technical works. Must be only read after a solid background in Babylonian Astronomy.
